

Fisherbrand filtration products

Fisherbrand™ is committed to providing quality products at affordable prices through its trusted proprietary range apparatus, consumables and equipment. All Fisherbrand items are manufactured to the highest standards and undergo rigorous quality assurance and testing procedures to ensure that they deliver on our promise of quality, reliability and value. Fisherbrand offers a comprehensive selection of quality filter papers, microfibre filters and other related products in a variety of formats that is bound to meet all of your filtration needs.

General purpose filter papers

A range of general purpose, basic filter papers especially suited for educational environments, with other non-specialist application areas in:

- Clinical labs
- Research laboratories
- Chemical, pharmaceutical, cosmetic, food and beverage industries

Qualitative filter papers, low ash

These extremely pure filter paper grades are made of cellulose fibres with an alpha-cellulose content of nearly 100% according to precise norms. The ash content for these grades is approximately 0.06%. Application areas include:

- Chemistry industry
- Food industry
- Beverage industry
- Atmospheric analysis
- Essential and industrial oils

Quantitative filter papers, ashless

These virtually ashless filter paper grades are made with 100% cotton linter fibres. As quantitative analysis requires high purity, these filters are acid-washed before being finally rinsed thoroughly clean with demineralised water.

- Ash content is 0.007%
- Analytical application areas throughout the chemical, food and beverage industries
- Also used in atmospheric analysis

Glass microfibre filters

These filters are made with 100% borosilicate microglass fibres and are binder-free. Their very fine fibres make these filters especially suitable for micro-filtration.

- Excellent level of particle retention (pore size 0.7µm to 2.7µm)
- Large load capacity
- Very high chemical purity - manufacturing process uses demineralised water to clean
- Non-hygroscopic and biologically inert
- High permeability to air
- Chemical resistance to most solvents and reagents (except hydrofluoric acid)
- Resists temperatures up to 500°C
- Low ash content of 0.007%
- Application areas in water, solvent and other filtration purification, sediment and dairy fats analysis, smoke and air monitoring, HPLC sample filtration, protein and cell purification

Quartz microfibre filters

Made from 100% microquartz fibres. Binder-free, without any glass-fibre content.

- Very high operating temperature resistance to 900°C
- Low heavy metal content
- Application areas include emission control of chimney smokes, exhaust gases and aerosols, analysis of acidic gases (except HF), and monitoring of suspended air particulates (e.g. lead)

Extraction thimbles

Manufactured from 100% high purity cotton linter fibres.

- Neutral and fat-free
- High mechanical strength
- Excellent retention capacity
- Compatible with most extractor systems

Syringe filters

A wide selection of membrane types, diameters and pore sizes available to help you select the optimum product for your needs.

- Sterile or non-sterile options
- High sample throughput
- Polypropylene housing - strong and chemically resistant
- Typical applications areas include purification of solvents, aqueous solutions, growth media, tissue culture media, buffers etc

General purpose filter papers

Technical specifications:

Product type	General purpose filter paper
Grade	122
Application areas	Filter paper used for all general usage in laboratories. Very fast filtration velocity
Weight (g/m ²)	73
Thickness (mm)	0.17
Pore size (μm)	17-30
Filtration speed (s) to DIN 53137	22
Burst strength (kg/cm ²)	1.25

Plain disc	Cat. No	Diameter, mm	Pack qty
	11795195	45	100

Qualitative filter papers, low ash

Technical specifications:

Product type	Qualitative filter paper, low ash
Material	100% alpha-cellulose
Grade	111
Application areas	Fast filtering, for coarse and voluminous precipitates like hydroxides and sulfides.
Weight (g/m ²)	84
Thickness (mm)	0.2
Pore size (μm)	12-15
Burst strength (kg/cm ²)	>0.30
Ash content (%)	0.06 approx.

Folded	Cat. No	Diameter, mm	Pack qty
	11724233	70	100
	11734233	90	100
	11744233	110	100

	11495208	240	100
	11780215	270	100
	11405218	320	100

Technical specifications:

Product type	Qualitative filter paper, low ash
Material	100% alpha-cellulose
Grade	112
Application areas	Medium fast filtering, typical grade for qualitative tasks such as sulfides, beer and malt analysis.
Weight (g/m ²)	84
Thickness (mm)	0.17
Pore size (μm)	8-12
Filtration speed (s) to DIN 53137	20
Burst strength (kg/cm ²)	<0.30
Ash content (%)	0.06 approx.

Quantitative filter papers, ashless

Technical specifications:

Product type	Quantitative filter paper, ashless
Material	100% cotton linter fibres, acid-washed and rinsed with demineralised water
Grade	11
Application areas	Fast filtering. Wide pore filter paper used for coarse and voluminous precipitates such as iron, aluminium and chromium hydroxides, Si-determination in steel and pig iron analysis
Weight (g/m ²)	84
Thickness (mm)	0.18
Pore size (μm)	12-15
Filtration speed (s) to DIN 53137	10
Burst strength (kg/cm ²)	>0.20
Ash content (%)	0.007%

Folded	Cat. No	Diameter, mm	Pack qty

Technical specifications:

Product type	Quantitative filter paper, ashless
Material	100% cotton linter fibres, acid-washed and rinsed with demineralised water
Grade	15
Application areas	Very slow filtering. Fine-pored filter paper used for extremely difficult filtration conditions such as cold barium sulfate, metastannic acid, cuprous oxide.
Weight (g/m ²)	84
Thickness (mm)	0.14
Pore size (µm)	2-3
Filtration speed (s) to DIN 53137	180
Burst strength (kg/cm ²)	>0.20
Ash content (%)	0.007%

Glass microfibre filters

Technical specifications:

Product type	Glass microfibre filters
Material	100% borosilicate microglass fibres, binder-free and rinsed with demineralised water
Grade	259
Weight (g/m ²)	52
Thickness (mm)	0.26
Pore size (µm)	1.6
Filtration speed (sec) according to Herzberg	60
Burst strength (kPa)	20
Binder	Free
Ash content (%)	0.007%

Plain disc	Cat. No	Diameter, mm	Pack qty

Quartz microfibre filters

Technical specifications:

Product type	Quartz microfibre filters															
Grade	293															
Material	100% microquartz fibres															
Weight (g/m ²)	85															
Penetration DOP% (0,3µm)	<0.002															
Efficiency of retention %	99.999															
Air resistance 40cm/s	20															
Pressure drop Pa à 3 cm/s	60															
Trace metal analysis (ppm)

Syringe filters

Guide to membrane properties

- to help you select the optimum product for your application

Membrane	Protein binding	Hydrophilic/hydrophobic	Chemical resistance	Applications
Hydrophilic PTFE	Low	Hydrophilic	High	Purification of HPLC organic and solvent /aqueous solutions
PES	Low	Hydrophilic	Low/medium	Purification of tissue culture solutions, buffers
PVDF	Low	Hydrophilic	Medium	Filtration of protein solutions
Hydrophobic PTFE	Low	Hydrophobic	High	Filtration of solvents
Nylon	Medium	Hydrophilic	Medium	Filtration of aqueous and solvent /aqueous mixtures

Cat. No	Membrane material	Diameter, mm	Pore size, µm	Sterile	Pack qty
15206869	PES	33	0.2	Yes	50
15216869	PES	33	0.45	Yes	50
15181489	Hydrophilic PTFE	25	0.2	No	50
